ADITYA JHA

Solutions Architect | AI Infrastructure: GPU, Kubernetes, Cloud & On-Prem | AWS Certified

Bengaluru, India | jha.aditya17@gmail.com | adityarjha.com | linkedin.com/in/adityarjha

SUMMARY

Solutions architect and pre-sales engineer who bridges R&D and sales: designing GPU and Kubernetes infrastructure and walking CXOs, procurement teams and non-technical stakeholders through it in simple language. Experience spans the full AI stack, from cloud platform engineering and LLM fine-tuning to on-prem GPU cluster deployments and the TCO decisions behind them. Currently owns solution design, commercials and program management for AI infrastructure deals at MiPhi.

EXPERIENCE

MiPhi Semiconductors (Micromax x Phison JV) **Feb 2026 - Present**

Solutions Architect (Pre-Sales)

- Solutions architect for all AI deals, working with multiple channel and SI partners: own technical discovery, system and cluster design, BoQ, client clarifications and end-to-end deployment across 30+ enterprise, education and government proposals.
- Designed and deployed ~INR 2 Cr of GPU clusters in the first 9 months: highly available on-prem Kubernetes clusters capable of running models up to 70B parameters, covering power, cooling, SLA, security and acceptance testing.
- Modeled cloud vs on-prem TCO, showing clients where on-prem breaks even against cloud; proposed on-prem solutions as an alternative to USD 15-20K a month of LLM API spend for a coding-agent rollout serving thousands of users.
- Sized GPU platforms for LLM inference and fine-tuning: audited the company's capacity model, fixed multiple errors and rebuilt it across dozens of configurations; produced and presented client-facing concurrency analysis across model classes.
- Presented solution decks with commercial options to an automotive OEM; built vendor-neutral BoMs for defense and government organizations across AI data center RFQs and government AI tenders.
- Led a 12-deliverable go-to-market package for an in-house agentic AI application and acted as authority on its commercials: licensing, margins, discount ceilings and TCO against competitors.
- Project manager of a 7-member AI product team, running daily scrums, assigning and tracking Jira tickets, and acting as the communication line between the team and upper management.
- Program-managed an AI/HPC server program end to end, coordinating a government R&D lab and a global EMS partner from initial scoping through to final quotation.

Osfin.ai **Jun 2025 - Jan 2026**

DevOps & Platform Engineer

- Set up and owned Jenkins CI/CD on 8 dedicated Kubernetes nodes, then migrated it from Azure to AWS with zero downtime and no data loss; cut build failures by ~30%.
- Co-managed production, UAT and development infrastructure on 2 Amazon EKS clusters (~16 worker nodes each); modular Terraform IaC cut provisioning time by ~40%.
- Cut CI compute cost by ~60% with containerized agents; built AWS cost dashboards and firewall visibility across AWS and OCI.

AMD India **Jul 2024 - Jun 2025**

Co-Op Intern, Generative AI

- Co-built a one-click LLM fine-tuning platform (model and dataset selection, live GPU and loss dashboards, automated evaluation) that AMD adopted into its internal tooling; orchestrated training pipelines on Kubernetes.
- Fine-tuned Llama 2 class models for Hindi, Odia and Tamil; quantization improved inference efficiency by ~20% on low-resource GPUs.

SKILLS

AI & GPU Infrastructure: Cluster design and Sizing, LLM inference and Fine-tuning, vLLM, Quantization, RAG, Agentic AI
Cloud & Platform: AWS, Azure, OCI, Kubernetes, Helm, Terraform, Jenkins, Docker, ArgoCD, Python, Shell
Pre-Sales & Delivery: Technical discovery, Solution Design, TCO and Pricing, BoM/BoQ, RFQ and Government tenders, Team Management, Partner management, Jira, Scrum

CERTIFICATIONS

- AWS Certified AI Practitioner — Oct 2025
- AWS Certified Cloud Practitioner — Sep 2025
- McKinsey Forward Program — Jul 2025
- Career Essentials in GitHub Professional Certificate — May 2025
- Real World AI Applications with Gemini and Imagen, Google Cloud — Apr 2025

EDUCATION

B.Tech, Computer Science and Engineering | KIIT University, Bhubaneswar | 2021 - 2025 | CGPA 9.31
